

PAYMENT GATEWAY

TRANSNATIONAL™
PAYMENTS • TECHNOLOGY • TRUST

Making payment technology simple and effective for your business

Merchants trust TransNational Payments to manage their payments in-store, online and anywhere their business takes them. We offer an industry-leading array of secure, innovative products and solutions that support the growth of our highly valued merchants and their businesses.

ACCEPT PAYMENTS WHEREVER YOUR BUSINESS TAKES YOU

Our payment gateway allows merchants to securely swipe or key-in credit cards through their web browser without terminal equipment; also allowing for integration and “omni” channel payment acceptance — our payment gateway does it all:

Customer Vault

Our customer vault allows you to securely store customer data and process payments without having to access cardholder information directly.

Fraud

iSpy Fraud is used as a first line of defense against the most common types of fraud — define what transactions you will and will not accept.

Integrations

Currently using QuickBooks® or Apple Pay? No problem. Our payment gateway seamlessly integrates with most third-party shopping carts for e-commerce.

Recurring Invoicing & Payments

Automate timely and multiple billings for new and existing accounts via either credit cards or ACH. This will allow for creative payment terms or 0% financing options.

Reporting

Our reporting provides the insights you need, by a variety of parameters including transaction details and transaction activity. Transactions can be searched by status, transaction type, date range, amount range, order ID and more.

Virtual Terminal

A virtual terminal replaces the need for a credit card terminal and allows a business to process credit card transactions online. With our payment gateway merchants can swipe sales on the virtual terminal using Swipe Software.
